### TESTIMONIAL LETTER

A year and a half ago I tested HIV positive. I did not become sick immediately but gradually my health became progressively worse. By June, 1990 my health had deteriorated to the point that my appearance would give a stranger the impression that I was either dying of cancer or AIDS. I no longer looked healthy. Prior to this I weighed 135 pounds and had a healthy look.

I became very sick and was admitted to a Baton Rouge hospital in June, 1990. My family and I had been to the Haelan office a few days before because we knew a man who recovered from severe health problems after using Haelan 851. I was skeptical but hopeful that the nutrition in the Haelan would strengthen me in my weakened condition. We purchased three bottles of Haelan at that time. The next day, before I had a chance to drink the Haelan, I was admitted to the hospital with "Numostus Pneumonia" and stayed there for 19 days.

While I was in the hospital my weight dropped from 135 pounds to 104 pounds and I became weaker by the day. I could feel what little strength I did have flowing from my body as I became weaker and closer to death. Everyone expected me to die and my family prayed for me constantly. My mother brought the Haelan to me in a thermos bottle and I drank it. A friend in New Orleans purchased an additional three bottles of Haelan 851 for me and brought it to me while I was still in the hospital.

I was as close to death as possible. While I layed in the hospital bed, I could feel the strength coming back into my body after I drank the Haelan. There was never a time that I needed energy and strength more than I did at that time ... and the Haelan 851 gave it to me. My family and I believe it saved my life.

After taking the Haelan I regained my appetite and my condition quit declining. From there on I was on the road to recovery. I was discharged from the hospital in a wheel chair. I was weak and frail but I was alive. I drank an additional six bottles of Haelan 851 in early September. My family could see and I could feel the improvement it made in my health. The more I took the stronger I became. We decided that if I was going to recover and be able to have a normal life the Haelan was the only thing that was going to get me there. My family purchased 60 bottles of Haelan for me on September 12, 1991 and I drank one bottle a day for the next two months.

My strength improved and I was out of the wheel chair walking in a week or so. I gained 23 pounds, my gums quit bleeding, my red blood cells increased in numbers and I was up and around town. The Haelan seems to have normalized my body. I feel normal again.

My friends can't believe how good I look after seeing me when I was down. A big thanks to Haelan. I don't believe I would be here today if it wasn't for Haelan 851. I intend to continue using Haelan to naturally strengthen my immune system whenever I feel week. I am now drinking one bottle of Haelan 851 per week and that keeps me feeling normal.

I am 29 years old now and look forward to many more birthdays, thanks to Haelan 851.

Sincerely,

David Dison
